INAUGURAL ADDRESS

by C. Wesley Lyons, Mayor

Gentlemen of the Council:

Tonight, we have assembled here for the purpose of organizing the government of the municipality for the year 1951, in accord with the Charter of the City of Rochester. Although these inaugural exercises may differ very little from any of those in the preceding years, you as Gentlemen of the Council and the citizens of our city have the satisfaction of knowing that they have a city government which has been a government close to the people. By this, it is my desire to convey that you as Gentlemen of the Council and all of those who have to do with the functioning of the affairs of Rochester, hold the interests of their citizens as their first consideration. I am also sure that, in return, the citizens who have elected you have done so because you have their confidence; and by the action that you have taken in their affairs, you have gained this standing.

It is not my intention at this time to have a lengthy inaugural address. You as Gentlemen of the Council are as familiar as I with the existing affairs and the operation of your city government. You are familiar with the needs. As you have heard me say many times before, I will again repeat that Rochester is a fine city. The services that we give to our residents are comparable with only a few municipalities in this area, and I will further repeat that Rochester is a city of friendly people, working together with one thought in mind, and that is that we may be progressive and clean, and make this community one to which people everywhere may wish to come, whether as citizens, just to make a friendly call, or to shop in our mercantile establishments, and that men and women may be employed in our up-to-date, cooperative industries. We are fortunate in the fact that we have diversified industry.

Your forethought has been definitely shown by the building of your new Public Works Garage, and by replacing the location of your former one with a free municipal parking lot. Yes, we have been a long time perhaps, in accomplishing this, but it has paid off. The thought and the time that have been devoted to this one project have enabled you to have the type of building equivalent to our needs, which together with the building of this municipal parking lot, has in no wise imposed a financial burden upon our taxpayers.

This has not been the only project that has taken time, thought and consideration. The development of our water system has been in that same category. We all know the seriousness of the situation. We appreciate that sometime early this late summer and fall, you were much concerned as to whether we would have sufficient water supply, should the drought continue. The fall rains came and we are absolutely safe again. These

chances cannot be taken too often, or need they be taken. I think, perhaps, and I will say that for the last three years, we have had various meetings and many studies, proposals and reports, which have been presented to you, not only individual plans but a number of plans. Together with this, you have had presented to you, reports of financial analysis, as to how the necessary notes may be amortized from earnings of the system. You could have easily, two years ago, engaged engineers and have made contracts for the development of this system. This would not have been wise because I am fully convinced and know that at that time neither you nor myself were confident that this would have been the right plan or the right procedure for the development of our system. Tonight we are, I believe, fully convinced that the increase of storage, which has been recommended to us of approximately 300,000,000 gallons, the laying of a new main from our reservoir into town, and a contemplated new line from Eastern Avenue to East Rochester will solve the problem for generations, and when this development is undertaken, we must not forget those two areas of Rochester that need water desperately and have needed it for a long while. I am referring to the Milton Road and the Old Dover Road.

So now that we are organized for 1951, let us not as individual committees but as a Council as a whole, take definite steps in the development of the Rochester water system, which not only you and I but the citizens of Rochester know must be undertaken.

In the past two years, you have made such changes in the departments of your municipality as to enable them to operate more efficiently. I am referring most especially to the Department of Public Works, which has consolidated its various divisions under one head in one department; and with the recent moving of this department into a new building, which has sufficient equipment, and with the proposed program of operation, you will operate in a businesslike and efficient manner. For quite some time we have devoted our thoughts to the improving and the building up with new equipment of the Public Works, Fire and Police Departments. You may well be proud of your accomplishments.

However, during these past years we have devoted little, if any, thought to the improvement of our Administrative Departments, and I am referring to our City Clerk's, Accounting, Board of Assessors' and Tax Collector's Offices. These offices are operating approximately the same as they were when we received our charter as a city, and it is needless to remind you that great changes have taken place during this past period of more than fifty years. Now, I am definitely not inferring any criticism on the offices of these departments or their operation, but I do know that we as Gentlemen of the Council have never given them any consideration. We have been on our toes in bringing all other departments up to peak production and efficiency by the installation of new automotive equipment, two-way radios or any other materials that might be necessary to build them up where they would be on a par with any other

city in the State of New Hampshire. But while we have devoted our thoughts to these departments, we have given no consideration to these administrative offices. At this time I am going to suggest that the Finance Committee take immediate steps to mechanize these offices. In our City Clerk's Office, we should have equipment for the metered water billing and the posting of payments with a ledger system which would not only make less work for that department but would also make our records more exact. Under this department also comes our payroll procedure. I am mentioning these two large items. Many others from this City Clerk's Office would be operated, using this same equipment. Our Board of Assessors have been conducting the affairs of their office with no changes for many years, and I definitely again will state that I am not criticizing the Board of Assessors or the way they are doing their work, but I most certainly suggest that they receive some consideration as to installation of more modern and up-to-date methods. Naturally, they could have done nothing about this because we as Gentlemen of the Council provided no funds for them to make changes. Nor were the Finance Committee able to do this because they, themselves, had not asked for moneys to work with.

For some time I have obtained information regarding the advisability of having an aerial map of our city. A few years ago, I thought that Rochester was not a large enough municipality to warrant the expense of an aerial map, but during this past year most especially, I have become fully convinced of this necessity. I have found that other cities throughout New Hampshire and this section of New England are taking these steps. By a map of this type broken into sections, you have your picture before you of each portion of the town or city, which is transferred into a ledger with each plot numbered. This is very essential for your Assessors' Office, and not only for this office but it can be used throughout the various departments of our city, most especially by the Tax Collector's Office and the Public Works and Fire Departments.

I further recommend that the Finance Committee immediately obtain information for a filing system and equipment for the above office, and also for the closely connected office of the Tax Collector, which should be equipped mechanically for the billing of our tax accounts; and this most certainly should be done on every individual piece of property that one might possess. For an example: a citizen owns more than one parcel; today, you receive one bill—so many thousands at such a tax rate—and when it comes time to make your federal return or to keep an exact record of your year's business, it is necessary that you go back to your Tax Collector's Office and get this breakdown. With modern, mechanized equipment, the name of the property owner, the amount which he owes on his assessed valuation in duplicate ledger card for the files is done in one operation. This, I will admit, is a very brief overall picture but in closing on this particular subject, let me make this statement that individual business, many times handling only a small proportion of the amount of moneys and service that we give, could not afford to operate without modern equipment. There-

fore, we as a municipality who are handling the moneys of our taxpayers and citizens, most certainly should take immediate steps to mechanize these departments for the convenience not only of these heads but of all our citizens. Within a few days, I will bring information regarding this to the members of the Finance Committee.

At some of my past inaugural addresses, I have broken down the several departments and discussed them individually, and as I have already stated, the Gentlemen of the Council and the Committees are familiar with these departments, and at this time I am going to speak of them briefly, with the exception of our school system.

In the setting up of our Department of Public Works in 1950, I am further convinced that this was a progressive step. It has worked well, and with the new Public Works Garage which we are now occupying, and with the completion of the final details of the operation of this department, we will have accomplished our objective.

The foresight of you Gentlemen in the purchasing of equipment for our Fire Department has put us on a par with any other department of comparable size. I feel that not only you, as Gentlemen of the Council, but our citizens are very proud of the equipment and the operation of this department. Our Police Department is functioning exceptionally well. Their automotive equipment, purchased new this past year, and their additional office equipment with extra files for their index system, has placed them in a position where they can give service and protection to their citizens and also cooperate with our neighboring cities and towns. At this time I want to recognize the importance of the friendly relationship and cooperation existing in this department toward other communities. This not only assists a Police Department in being efficient, but also stimulates exceptional good will throughout the area.

It is my desire to recognize at this time the efforts devoted by the Committee on Public Buildings in the remodeling and the painting of our Gonic Hall. This project is one that not only the people of Gonic should be proud of, but Rochester as a whole. At the moment, our Public Buildings are in average condition, and I am extremely happy that East Rochester and Gonic now have halls which are presentable and clean for the convenience of those gatherings that are held there, and also for the housing of the new fire equipment which was installed in 1949, and I further know that with the installation of automatic heat, we are not only safeguarding this equipment but are also giving a maximum amount of heat at a reasonable expenditure. And in bringing to your attention the efforts of the Committee on Public Buildings, I also want to convey my thanks to the Special Building Committee on the Public Works Garage and the Municipal Parking Lot for their cooperative efforts and the unlimited time that they have devoted to this project.

For many years, democracy has been taken for granted as a part of our American heritage. Recent trends in world affairs

have given a new meaning and a deeper significance to the cause of human freedom. There is a growing realization that freedom is not being bestowed automatically upon each generation, but is something which must be developed, safeguarded and exercised continuously by each individual. The total disregard for the worth and dignity of the individual in totalitarian governments has created renewed interest and concern for the improvement of human relations. The framers of our Constitution saw clearly the need for community action concerning knowledge and learning as essential factors in the preservation of free government. Thoughtful citizens now recognize that the survival of democracy depends on greater equality of opportunity for all persons irrespective of race, color or creed. In a world in which people are becoming more dependent upon one another for their existence, the need for cooperative and peaceful solution of common problems is becoming more and more apparent.

The continued development of the American way of life places a considerable demand on our public school system. The teacher of the future must be prepared for responsibilities previously unknown to the profession. The ever-increasing number of pupils enrolled, the new demands of modern curriculums, and additional services will require increased financial support. Like any other skilled workman, the good teacher to be effective must have appropriate materials and tools with which to work.

The City of Rochester has been able over a period of years to provide satisfactory educational opportunities for its youth. At the present time, our schools are equipped to provide an adequate program at a per capita cost of instruction that is well below the state average. The people of Rochester accept and treasure the values from which democracy received its deepest meaning and will continue to provide good schools as a sound investment in abiding values. As the new needs of our schools are formulated to provide for the mental, physical, and emotional well-being of our youth during the era of a cold war or its consequences, they must be analyzed with care and financed accordingly, with educational outcomes and the welfare of youth as the determining factors.

As I conclude these remarks regarding our individual departments, I take this as an opportune time to thank these heads, and I also recognize the assistance given by those men in our Department of Public Works who have been so cooperative, not only in their daily duties but in times of emergency when the hours have been long; our teachers who are responsible for the education of our children; the janitors who maintain our public buildings; and last but not least, those who serve us in our Administrative Departments, for their cooperation which they have so graciously given during this past year, and the above together with the consideration and assistance that has been given by you as Gentlemen of the Council has not only made possible an efficient and harmonious functioning of our affairs but has also made it a pleasant experience for me to be allowed to work with you.

At the regular December Council meeting as your Mayor and a member of the Finance Committee, I asked the heads of all our departments to immediately go to work in preparing the budget for 1951. In past years, we have operated our municipality for five months without a budget. Now that we have set up heads that are not to be re-elected each year, we should take advantage and immediately at the beginning of the year have a working budget for the operation of every department for 1951. Now, this can be accomplished. Even though, perhaps, the budget is not brought before the taxpayer at a public hearing until a later date, we will know where we stand financially.

With the assistance of our City Accountant, I prepared for you and the taxpayers of the City of Rochester, a pamphlet which was enclosed in every tax bill and placed in convenient places in the City Clerk's Office and in the Office of our Tax Collector, so that the taxpayer might be enabled to have information as to where and for what department his tax dollar was spent. I, personally, have received many comments on this pamphlet. If it meets with the approval of you as Gentlemen of the Council, a pamphlet for 1951 will be prepared.

The accomplishments that you as Gentlemen of the Council have achieved during the past years have been outstanding. However, we must not become too elated with this success to the neglect of constant vigilance. High standards must continue to be maintained and constant check must be made to avert all losses. The cause of failure must be determined regularly or success will drift into failure. We live in a crucial period of history when men's consciences are being tried and human conduct molded. A municipality such as ours confers rights and privileges which entail also definite consequences. We must face these consequences by a devotion to principle and fair dealing with all. The duty of putting your program into effect depends upon the initiative and cooperation of each individual member of this Council. I sincerely believe that such a factual picture exists. May it continue to do so and may it never fail.

IMPORTANT RESOLUTIONS AND ORDERS

Passed by the City Council, 1951

RESOLUTION TO RESCIND VOTE OF MARCH 7, 1950, ON APPROPRIATION OF $25,000.00 FOR CITY GARAGE

Be it resolved by the Mayor and City Council of the City of Rochester: That the resolutions passed March 7, 1950, be rescinded as follows:

1. That the sum of twenty-five thousand (25,000) dollars be and is appropriated for the purpose of constructing a municipal garage on land owned by the City on the westerly side of the Old Dover Road in Rochester.

2. That the Finance Committee be and is hereby authorized to borrow such sum or sums as by it is deemed necessary for the construction of the said municipal garage in accord with the aforesaid appropriation upon such terms as by it is deemed best for the City.

Passed January 2, 1951.

RESOLUTION TO APPROPRIATE $15,000.00 FOR CITY GARAGE

Be it resolved by the Mayor and City Council of the City of Rochester: That the following resolutions be now accepted:

1. That the sum of fifteen thousand (15,000) dollars be and hereby is appropriated for the purpose of constructing a municipal garage on land owned by the City on the westerly side of the Old Dover Road in Rochester, and the balance of thirty thousand (30,000) dollars be taken from Revenue Surplus.

2. That the Finance Committee be and is hereby authorized to borrow the sum of fifteen thousand (15,000) dollars for the construction of the said municipal garage in accord with the aforesaid appropriation upon such terms as deemed most advantageous to the City of Rochester.

Passed January 2, 1951.

AMENDMENT TO THE ORDINANCES RELATIVE TO PARKING

Be it ordained by the Mayor and City Council of the City of Rochester: That Chapter XIV, Section 8, of the General Ordinances be amended by inserting after the portion "on the southwesterly side of Central Avenue between Hanson Street and

Portland Street" the following clause: "on the easterly side of Main Street, Gonic, adjacent to the property of St. Leo's Parish, a distance of 108 feet," so that Section 8 shall read as follows:

"Section 8. No vehicle shall be parked or left standing within the City of Rochester upon the following portions of streets: Northwesterly side of Pine Street between a point two hundred and fifty feet southwesterly from North Main Street and North Main Street; southerly side of Bridge Street between River Street and North Main Street; Congress Street from Central Square to Arrow Street; easterly side of Congress Street from Arrow Street to Charles Street; southeasterly side of Liberty Street between a point fifty feet westerly from South Main Street and South Main Street and between a point fifty feet easterly from Charles Street and Charles Street; northwesterly side of Liberty Street between South Main Street and Charles Street; Hanson Street on the northerly side between a point fifty feet easterly from Central Square and Central Square; Sturtevant Court; Linscott Court; on the southwesterly side of Central Avenue between Hanson Street and Portland Street; on the easterly side of Main Street, Gonic, adjacent to the property of St. Leo's Parish, a distance of 108 feet; nor within ten feet of any fire hydrant."

Passed January 2, 1951.

RESOLUTION TO BORROW MONEY IN ANTICIPATION OF TAXES

Be it resolved by the Mayor and City Council of the City of Rochester: That the Finance Committee be authorized to hire in anticipation of taxes a sum not exceeding three hundred and fifty thousand dollars ($350,000.00). Said sum to be hired on notes of the City at such time as the best interest of the City requires.

Passed January 3, 1951.

AMENDMENT ON SALARY ORDINANCE

Be it ordained by the Mayor and City Council of the City of Rochester: That Chapter XXIII of the General Ordinances known as "Salaries" as amended be further amended by striking out the whole of said Chapter XXIII together with all amendments thereto and inserting in place thereof the following:

Section 1. *Purpose.* The salaries of all City Officers and all City Employees shall be in full payment and final satisfaction for all services required by law and shall be fixed at the annual rate, unless otherwise specified, and shall be payable as hereinafter designated.

RESOLUTION TO PURCHASE EQUIPMENT AND LAND FOR SANITARY METHOD OF DISPOSAL

To the Honorable Mayor and City Council of the City of Rochester:

WHEREAS, on February 21, 1951, this Honorable Body voted that a sum not to exceed $11,500.00 be raised by means most advantageous to the City to purchase equipment and land for sanitary method of disposal, same to be charged to the Health Department through the joint cooperation of the Sanitary Dump Committee and the Purchasing Committee, and

WHEREAS, said vote did not specify how said sum was to be raised, and

WHEREAS, said purchase is a capital expenditure by the City of Rochester.

NOW THEREFORE, be it resolved by the Mayor and City Council that the vote of February 21, 1951, in so far as said vote does not refer to the raising of money be amended by adding thereto that the Finance Committee be authorized to raise the amount of $11,500.00 in the manner deemed most advantageous to the City, and

Be it further resolved that the aforesaid vote be further amended by striking from said vote the words, "Health Department" and substituted therefor the words, "The City of Rochester for the Health Department," and

Be it further resolved that except as amended above, all the provisions and requirements of the original vote remain in force and apply to said authorization as of this date.

Passed March 6, 1951.

RESOLUTION TO APPROPRIATE $15,000.00 CONTRIBUTION TOWARD CONSTRUCTION OF ISINGLASS BRIDGE

Be it resolved by the Mayor and City Council of the City of Rochester: That a sum not to exceed Fifteen Thousand Dollars ($15,000.00) be raised and appropriated by the Finance Committee in such ways as they may deem most advisable and advantageous to the City of Rochester, the same to be used as Twenty-five Per Cent (25%) of the total cost for the construction of a new bridge over the Isinglass River to replace the present bridge now in use. This bridge is to be a Federal Aid

Secondary project. The remainder of Twenty-five Per Cent (25%) of the cost is to be paid by the State of New Hampshire, and the remaining Fifty Per Cent (50%) is to be from Federal Secondary funds. AMENDMENT OF ORDINANCES REGARDING GARBAGE AND REFUSE

Be it ordained by the Mayor and City Council of the City of Rochester: 1. Amend Chapter XI of the General Ordinances, Section 8, by striking out said Section and inserting in the place thereof the following new section:

No person shall dump stones, rubbish, dirt, ashes, lumber, garbage, refuse or other thing in or upon any highway street, lane, alley, sidewalk or other public place in the City of Rochester. Any vehicle carrying any stones, rubbish, dirt, ashes, lumber, garbage, refuse or other thing, which may fall or be blown from said vehicle shall have the load tied, covered, or otherwise secured so as to prevent any spillage of any stones, rubbish, dirt, ashes, lumber, garbage, refuse or other thing into or upon the highway, street, lane, alley, sidewalk, or other public place in the City of Rochester. Failure to tie, cover or otherwise secure any stones, rubbish, dirt, ashes, lumber, garbage, refuse or other thing by the operator of said vehicle shall be prima facie evidence of a violation of this section. Any person convicted of any offense mentioned in this section shall be fined not more than twenty ($20.00) dollars.

2. Further amend Chapter XI after Section 10, the following new section:

Section 11. The Commissioner of Public Works, under the direction of the Mayor and the Board of Health, and standing committee on public works shall exercise general supervision, control and direction, on behalf of the City, over all matters pertaining to the regulation of hours of dumping, places for deposit and proper means of disposal of all refuse at any City dump.

ACCOUNTANT'S STATEMENT

April 1, 1952

To the Mayor and Finance Committee, City of Rochester, N. H.:

I have examined the general books and related records of the City of Rochester, and also the separately maintained books of the Water Works division, for the year ended December 31, 1951. I have completed the accounting work required to put the books and records in order, prepared and incorporated therein all essential closing and adjusting entries; closed the books for the year, and prepared therefrom the attached financial statements with supporting schedules showing the results of the operations of the city departments for the year and the financial position of the City of Rochester as at December 31, 1951.

For the period June 1, 1951, through December 31, 1951, when no city accountant was regularly employed, all accounts, original book entries and supporting vouchers were examined and verified as to their propriety, as to proper authorization, approval, and accuracy of distribution to the accounts. For the first five months of the year, extensive checks were made, to the extent deemed necessary to satisfy myself as to the substantial correctness of the records for that period.

No examination was made of detail records independently maintained by the public library, municipal court, schools, or in the tax collector's office. There was no direct confirmation of indebtedness from debtors as to the correctness of the amounts indicated as due from them by the books. Cash on deposit was not confirmed direct with the bank. Creditors and holders of city notes or bonds were not circularized to verify the accuracy and completeness of outstanding indebtedness reflected in the books and records. These steps were omitted as being beyond the scope of my assignment.

In my opinion, subject to the foregoing and the comments on the balance sheets, operating statements and supporting schedules herewith, the attached balance sheets and related statements of appropriations, revenues and operating results of the city departments fairly present the financial position of the City of Rochester at December 31, 1951, and the result of its operations for the year then ended, in conformity with generally accepted municipal accounting principles applied on a basis consistent with that of the preceding year; except for the change made in the accounting system of the Water Works division to record the sales of water to consumers on a full accrual basis instead of on a modified cash basis, as noted on the statements of that division.

Respectfully submitted,

JOSEPH A. CLARKE.

COMPARATIVE SURPLUS ANALYSIS

(Profit and Loss)

AS AT DECEMBER 31, 1951

	1951	1950	Increase or (*) Decrease
Balance as at January 1,	$81,340.76	$64,961.04	$16,379.72
Add:			
Net profit from operations,	27,653.36	16,379.72	11,273.64
Balance as at December 31,	$108,994.12	$81,340.76	$27,653.36

Note A—In the year 1951 the method of accruing sales has been changed to the accrual basis, which takes into account all sales actually made during the year. Under past methods, a substantial portion of sales made in one year were carried over and not reported as sales until the next year. To effect this change in the accounting method, it was necessary to include $25,046.44 in commercial sales, and $1,087.63 in industrial sales (December 1950 meter readings credited sales on the books in January 1951) or a total of $26,134.07, which do not represent current year sales.

Note B—It was deemed advisable to make provision for a possible loss due to possible uncollectibility of accounts owing by customers, which are in arrears. As of December 31, 1951, accounts aggregating $2,391.99 were past due beyond the ninety day period. Consequently, a provision of $2,000.00 was made to cover any loss from this source, when and if it is realized.

Excluding the extraordinary items mentioned in Notes A and B above, the total profit before depreciation as shown in the operating statement would be $17,308.03 for 1951 as compared to a figure of $30,031.99 for 1950. Final net profit after depreciation as shown in the operating statement would be only $3,519.29 for 1951 as compared to a net profit figure of $16,379.72 for 1950.

REPORT OF THE DEPARTMENT OF PUBLIC WORKS

The Department of Public Works, as organized under the General Ordinances and Amendments adopted in January, 1950, is charged with the responsibility for the construction and maintenance of streets, water supply and distribution system. bridges, sidewalks, storm and sanitary sewers; maintenance of public parks and lands and the collection and disposal of ashes and rubbish.

Employees: 50.

EXPENDITURES

Charged to Highway Budget	$110,641.28
Rubbish Collection Budget	18,337.65
Sanitary Sewer Budget	2,725.77
Shade Trees, Parks and Commons (including Playground Supervision and Expenses)	9,417.28
Total Public Works Budget Expenses	$141,121.98
Per Capita Public Works Budget Expense	10.24
Cost of above per Tax Dollar	0.161

To the Honorable Mayor and City Council, Rochester, N. H.:

In the early months of 1951 we were favored with moderate winter storms, so spaced that plowing and removal operations were easily and economically handled. At the end of the snow season less than $10,000.00 had been spent on snow and it was felt that an additional $1,000.00 or a total of $11,000.00 would cover snow costs to the end of the year. A series of four storms from December 15th to the end of the month exhausted the small balance in the snow removal budget account and this account came out at the end of the year with a deficit of over $5,000.00.

Employees of the Water Division were used whenever possible to speed up snow removal. At other times during the winter months brush was cut and cleaning up done around the ponds and reservoir.

Due to the slight accumulation of snow, street cleaning and bush cutting operations were carried on from time to time from the first of the year. Some of the more dangerous curves and intersections, especially on school bus routes, were the locations where brush was cut. In the middle of the summer many of the country roads were again sprayed with brush killer and while all species of brush are not killed by this method, a large proportion of the usual roadside brush has been killed.

As soon as the weather moderated in the spring the sewer drops were cleaned and a little later work on the City Hall parking lot was resumed. Pipe was laid and drops were built by the Sewer Division and the grading and tarring completed by the Highway Division.

The water storage tanks on Salmon Falls Road and Rochester Hill were painted by contract in the late spring. Some trouble was occasioned in the latter part of the winter by an unusually high concentration of microscopic algae in the water at the reservoir. This was believed to have been caused by the light snow cover having encouraged their growth by allowing a large amount of light to pass into the water below the ice. Officials of the State Department of Health were most cooperative in working with the City with the result that soon after the ice left the reservoir, the taste that had been noticeable for several weeks, due to the algae, was brought under control. Many tests, during the time that the algae were causing an objectionable taste in the water, showed that at all times the water was perfectly safe for consumption.

During the spring, gravel was hauled to improve and maintain gravel roads in all sections of the outskirts of the City and several were prepared to receive tar for the first time. The total length of the latter being 1.3 miles.

Tarring was started in the middle of July and carried on until September. As was the case in the previous year, over 80,000 gallons of tar was applied at this time and several thousand gallons more were applied when the streets in the Brookdale section were surfaced in the fall.

Two major projects were completed by the Water and Sewer Division during the summer. These were the sewer project in the Brock Street section and the water main extension on Summer Street, East Rochester. Several smaller water and sewer extensions were made which are listed elsewhere in this report and a storm sewer was laid on Autumn Street Extension approximately 500 feet in length.

In the spring a sewer cleaning machine was hired from the Sanford Sewer District to try to clean the storm sewer main on upper North Main Street. This main had not taken water properly for several years. Several cubic yards of sand and roots were removed from the pipe and the main has functioned perfectly since it was cleaned. Many of the members of the Council saw this machine in operation and were so favorably impressed that early in the summer a similar machine was bought for the Sewer Division. Up to the end of the year about 2,500 feet of main had been cleaned and returned to full capacity. If we had not bought this machine it would only be a question of time before these mains would have become completely filled and would have had to be relaid at a cost of more than ten times that of cleaning them by this method.

All of the usual maintenance operations were carried out throughout the year by all divisions of the Department. Some of these being street cleaning, flushing sewer mains, repairs to bridges, patching streets, repairing culverts, water mains and services, tree work and many other functions.

In the early spring it was decided to eliminate the burning of rubbish at the dump and to operate the area as a sanitary fill.

Much favorable comment was created by this move as the smoke nuisance has been checked and all users of the area can enter with cars and trucks with little danger of damage to tires. As expected, this method of dump operation has been more expensive by a considerable amount but many feel that its advantages outweigh the extra cost.

In closing, I wish to extend my thanks to the Mayor and members of the Council and especially the Public Works Committee for their help in working out the problems that have arisen during the year. I, also, want to thank all employees of the Department for their loyalty and cooperation in the performance of their regular tasks and, above all, for their willingness and dependability in the performance of emergency work at all hours and in all seasons.

REPORT OF CITY SOLICITOR

To the Mayor and City Council of the City of Rochester:

I herewith respectfully submit to you my second report as City Solicitor for the fiscal year 1951.

At the September Term of the Superior Court held in Dover, New Hampshire, the suit of the City against the Boston and Maine Railroad for damages and expenses incurred by the City in the fighting of the fire of October, 1947, resulted in a disagreement of the jury and mistrial. An appeal to the Supreme Court of New Hampshire has been taken by counsel for the railroad.

All other legal questions which have arisen during the year have been disposed of without litigation.

I wish to express to you my appreciation for the continuing cooperation given me by Marshal Vane E. Nickerson and all members of the Rochester Police Department; the officers of the Municipal Court; Mayor Lyons, members of the Council, the City Clerk and all other city officials during my second year of office as City Solicitor.

Respectfully submitted,

PAUL B. URION,
City Solicitor.

The total amount of construction for the last year $677,222 is $172,699 less than 1950. The decrease will continue as long as high costs of construction and government restrictions continue.

MILES H. DUSTIN,
Building Inspector.

REPORT OF THE PLANNING BOARD

To the Honorable Mayor and City Council, Rochester, N. H.:

Gentlemen: The Planning Board was instituted in August, 1941, under Mayor Charles H. Felker. It is a fact-finding board serving without pay. The members may investigate any project beneficial or detrimental to the City on their own initiative or at the request of citizens or the City Council.

The Planning Board was asked to investigate eight projects the past year.

Present members and terms of office are as follows:

Ex-Officio	Mayor C. Wesley Lyons	To Jan. 1, 1952

REPORT OF LIBRARIAN

To the Board of Trustees of the Rochester Public Library:

Gentlemen:

In summarizing the work of the year 1951 for this fifty-eighth annual report to the Board of Trustees, books have successfully vied for first attention. Although many libraries with sufficient funds and space have expanded to include such attractions as films and television, the Rochester library has continued to emphasize books, with the yearly result showing a gain in circulation of 4,496. The tables of statistics appended form the vital part of the report but yearly comparisons are of interest, indicating the reading trend. With each report we think this trend to be of a local nature but with summaries from other sections we find it to be more often a national trend.

Five percent less fiction was read than during the previous year and twelve percent more non-fiction was read. There was less of history and travel because history is being made, not written; and travel, which is always a popular reading item, is now largely of a military nature. But civics and science show a gain of thirty percent over last year, reflecting the complexities of the world around us. In a democracy everything ultimately depends on the character and intelligence of our people. The older forms of protection for our country, geographical isolation, industrial strength and military power, are now obsolete. The character and intelligence of our people are now their only protection. With the 1,022 books purchased the objective has been to furnish the best of the books published during the year to thus enrich and fortify the lives of the readers.

A major function of a library is its reference department. New encyclopedias and handbooks have been added for basic information but people are so geared to the passing moment that periodical literature is often our most valuable source of information. Our reference students numbered 1,963; 1,152 questions were presented to the assistants for individual help and eight percent more magazines and pamphlets were loaned for home use.

In the children's room, weekly story hours, contests, seasonal book displays, classes for library instruction and extension of service to the East Rochester Grammar School have increased the work as well as the rewards. Total circulation in this department showed a gain of 5,649 over last year. The East Rochester project, begun in March to continue until the end of the school year in June as a trial period, proved to be a service very much needed and in September was resumed. Many children had had no previous contact with books for enjoyment and the enthusiasm of the children together with the splendid cooperation of the teachers have compensated Miss Seavey for her efforts. Two forenoons weekly the books are transported

to the school for their own selections of reading to be made. One hundred and nineteen borrowers registered and an average of 38 books per pupil have been read since the service was started.

Many more parents are accompanying their children to the library, assisting in choosing a book to the child's individual taste or often seeking out the books which Mother and Dad enjoyed when the same age. This sharing of books by parents and children is a source of lasting mutual satisfaction. A shelf of selected books for parents to read to children is always reserved in the children's room, as well as shelves of books on child study and guidance in the adult reading room. We are confident that the numbers of young readers in this room will increase when the child-size furniture is installed in February.

The East Rochester agency has operated for the full year and the Gonic agency for that period as covered by the school year, with both showing an increase in the numbers of books loaned. We have continued to send books monthly to the Gafney Home for the Aged and in April started a monthly service to Wood's Convalescent Home.

For several years staff changes have made necessary the training of inexperienced assistants. Such training periods are expensive, requiring full-time supervision of a trained staff member, thereby reducing the efficiency of service and handicapping the completion of the program of work as outlined in the annual agenda. In March Mrs. Scott was again obliged to request leave because of illness which is still necessitating her absence. Eleanor Smith was engaged in April as general assistant in the adult department. In the children's room the resignation of Miss Johnson in June, to continue her education in the University of Denver, was a great loss to that department. We are continuing to hope that New England and library work may lure her back at the completion of her education. Beverly Clough, a student at Spaulding High School, began training in August to assist two hours daily in this department.

The library has acted as a clearing house for many gifts of books and magazines. Books not needed as additions or replacements have been passed on to good use to our Gonic agency and to Wood's Convalescent Home. We thank all donors for their thoughtfulness as well as gifts. We also thank the Rochester Courier and Foster's Daily Democrat for the many news items and book lists published, and Radio Station WWNH for all announcements they have given to their listeners.

The physical plant must always be secondary to its functions, but that, too, must be repaired and improved to meet increasing demands. The oil heating system, removed in compliance with the government order in 1944 has been re-installed, releasing the fuel room for a much-needed storage room. This room will have to be freshened throughout before any use can be made of it. The refinishing and refurnishing of the children's room, provided for in our 1951 budget and begun in June is still incomplete, due to the many months required for building the furniture. The balance shown in the financial statement is suffi-

cient to cover the payment of this item, together with that of the cost of the heating installation.

The per capita tax for the city's appropriation to the library this year was $1.33; the value received was the enjoyment and benefits derived from 45,083 books and thousands of magazines; the per capita circulation of which was 5.58 and per registered borrower was 13.7. We hope to attract more borrowers to the library during the coming year by increasing our publicity. We also hope to make books more available to our borrowers by a trial period of the open stack system. Although the building arrangement is most inconvenient for both borrower and worker to attempt this trial it is necessary for the best of service. Few libraries operate with the closed stack sytem. Posibly architectural changes may later be made to facilitate entrance to the stack room.

Another year of progress has been made possible by the co-operative spirit of the trustees and staff members.

Respectfully submitted,

E. VELMA FOSS,
Librarian.

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Rochester School Board:

This is my third report and the sixtieth in the series of annual reports of school superintendents in Rochester, N. H.

It includes financial statements of the School Department, the School Lunch Program, and the Student Activity Association. The annual reports of the Spaulding High Principal, the School Nurse and the High School Librarian are submitted herewith.

CHANGES IN SCHOOL PERSONNEL

The following teachers terminated their services in the Rochester Schools at the close of the school year in June, 1951: Alson Brown, Agriculture; Morelle Connell, English; Edward H. Herlin, Science and Math.; Virginia McNamara, Math. and Social Studies; Mary Berzunza, Junior High English, Math., Social Studies; Donald Clark, Junior High Science; Marjorie Herlin, Maple Street School, Grade Six; Edith Ricker, School Street School, Grade Six; Hope Danielson, School Street School, Grade One; and Doris S. Buswell, Vocal Music. Laura Elms retired at this time having completed a teaching record of 43 years.

There were three other teacher resignations during the calendar year 1951. Violet Davis resigned in April 1951 and was replaced by Winnifred Cotton. Helene Blanchard, having resigned as of April 6, 1951, was replaced by Hope Danielson. Gladys Redlon, Principal and teacher of Grade Two at the Maple Street School, retired in December 1951 having completed 39 years of teaching. Louise Maxam replaced Gladys Redlon and Winnifred Cotton was elected to teach Grade Five for the remainder of that school year.

C. Edward Goodwin, Attendance Officer in the Rochester Schools for more than 29 years, retired as of March 23, 1951, and was replaced by Frank N. Dow.

New teachers employed at the beginning of the school year in September 1951 include: Arthur Cutter, Agriculture; Paul R. Doe, Chemistry and Science; Dorothy Flint, Math. and Social Studies; Virginia Hawkensen, English and Public Speaking; Thomas Hennessey, Junior High English; Donald V. McDuffee, Junior High Science; Edward L. Tucker, Junior High English, Math. and Social Studies; Noreen Spelman, Vocal Music; Helen C. Hennessey, Maple Street School, Grade Six; Blanche B. Young, Allen School, Grade Four; Therese Carroll, School Street School, Grade Six; and Flora V. Wotton, School Street School, Grade One.

ORGANIZATION AND ENROLLMENTS

The enrollment by schools and grades (see Tables A and C) indicates congestion in certain classrooms in the elementary schools. A class of about thirty pupils per teacher in grades 1-6 permits efficient instruction. A maximum enrollment of thirty-five pupils per room in these grades is recommended. There are nine elementary classrooms with an enrollment of 35 pupils or more at the present time.

A study of the school census (see Table B) indicates a significant increase in our school population in the near future. It appears that an additional classroom will be needed for the grade one pupils in September 1952. The number of new homes with children being established in Rochester since the last school census indicates a need for the further reassignment of pupils to equalize the classroom enrollments at the beginning of the next school year. An additional elementary teacher may be required soon because of the constantly increasing enrollment in the intermediate grades. The construction of a new air base and other employment due to Federal Government activities in this area creates an unpredictable situation in our schools. We have four classrooms available for additional teachers in the lower grades at this time.

TRANSPORTATION

The transportation of school children in the City of Rochester is a significant problem. The schedule requires continuous revision due to the change in numbers transported. The reassignment of pupils to relieve congestion in certain schools will further complicate the schedule.

The total cost of transporting pupils to the Rochester schools, public and private, amounted to $18,705.69 for the year ending in June, 1951. The per pupil cost per mile is comparatively low due to the number carried. (Refer to Table D.)

In order to reconcile reasonable demands and costs for school transportation minimum transportation distances and maximum walking distances to a school bus should be established.

The policy of transportation to all the public and private schools should continue to recognize other factors than distance. The age of children and the lack of sidewalks along certain heavily traveled highways are the main exceptions.

Many requests for additional stops and the extension of bus routes to include side streets cannot be approved due to limitations of time and equipment. Pupils living along bus routes should expect to share inconveniences comparable to those who are required to walk a reasonable distance to school. The City is not required by State Law to furnish transportation to any child who lives less than two miles from the school to which he is assigned unless he is physically handicapped. Pupils may be required to walk a distance not to exceed one and one-half miles to meet an established school bus route or a distance of one mile to other transportation. These laws apply to pupils in Grades 1 to 8 inclusive or to other pupils under fourteen years of age.

There are four basic factors for consideration prior to major changes in the present policy of transporting pupils:

1. The reassignment of pupils.
2. The approved distances for transporting pupils.
3. The cost of the proposed transportation.
4. The present transportation contracts that expire in June, 1954.

CURRICULUM, GUIDANCE AND INSTRUCTION

Teachers in the Rochester Schools are undertaking advanced professional study on a regular schedule. Each teacher must acquire a minimum of six semester hours every five years. At the present time the professional staff of seventy-three members includes thirteen with the Master's Degree and twenty-three with the Bachelor's Degree (see Table E). Twenty-three teachers have acquired five or more such credits during the last two years and nine other teachers three points or more since July, 1950. The Standard Red Cross First Aid Course has been completed by twenty-two teachers in the five elementary schools and twenty-six teachers in the upper grades since September, 1951.

Adult evening classes in vocational subjects are being offered at Spaulding High School with the following enrollments: machine shop, 17; sewing, 24; shorthand and typing, 34; cabinet shop, 17.

A carefully planned program of evaluation and improvement is under way in the Rochester schools. Achievement and ability tests for elementary school pupils have been administered and scored by the University of New Hampshire Guidance Department. The results of these tests were gratifying. The grade medians for all the Rochester elementary schools were substantially above the standard norms in all subjects including reading, arithmetic, language, spelling and handwriting. The results of these tests indicate that satisfactory work is being done in our schools and clearly designate areas wherein certain pupils need additional help and special consideration.

A three-day workshop for Rochester elementary teachers to study and formulate these needed improvements was held in May, 1951, under the guidance of specialists.

Guidance tests have been given to grades 9 and 11 at Spaulding High School. These aptitude tests reveal the individual pupil's vocational interests and abilities and are significant in the selection of courses throughout high school and college. Plans are under way to provide a complete testing program for all pupils in grades 1-12. Such a testing program provides essential information for curriculum revision and estimates the growth of each pupil according to his capabilities and effort.

I believe that more attention should be given to pupil guidance, counseling, and individual services that improve the mental and physical health of children. At least one full-time guidance worker, with special training in psychology and counseling, is needed in the Rochester schools in addition to the present guidance services at Spaulding High School. Educators agree that an adequate program of individual counseling requires the services of one such person for about 400 pupils if proper attention is given to the attitudes, ideals, study habits and growth of individual pupils. All of our elementary school principals undertake a full teaching schedule in addition to the administrative work.

A cumulative record showing the ability and growth of each pupil over a period of years is now being kept in the Rochester schools. These folders include results of tests, records, and samples of the pupils' work in various grades and subjects along with pertinent information about maladjusted pupils. This information is invaluable for guidance and remedial instruction.

The additional guidance work recommended in our schools would provide the necessary information for better classification of pupils, an improved reporting system to parents, proposed improvements in the curriculum and better integration between the elementary grades, the high school, and college.

I hope that the guidance program can be expanded to the extent that the number of pupils leaving high school prior to graduation will be greatly diminished and that all pupils with the ability can be recommended and enjoy success in college.

Opportunity for the Superintendent of Schools to give more attention to the curriculum and teaching methods should be provided. The supervision necessary for proper care and maintenance of school buildings and facilities has increased considerably in recent years due to the number of new activities and services that are now carried on in our schools by popular demand. We have reached the point where the supervision of the 3 B's—budgets, buildings, and buses are endangering the 3 R's.

SCHOOL BUILDINGS AND GROUNDS

The following major improvements have been made in the physical plants since my last annual report.

At Spaulding High School:

1. Redecorated auditorium, music room, and ten classrooms with fresh paint.
2. Replaced ceiling over hallway at front entrance to gymnasium.
3. Installed copper eaves troughs and spouts at building exits by auditorium and cafeteria.
4. Resurfaced roof over auditorium.
5. Rehung doors and repaired locks and fixtures as needed at ten outside exits.
6. Overhauled vapor turbines and oil burners for heating system.
7. Replaced worn stair treads and floor tiles in hallways and on stairs as needed.
8. Painted outside window sills.
9. Rebuilt press box on athletic field.

At the Gonic School:

1. Replaced cement apron around building.
2. Replaced cellar window sash and casings.
3. Installed new fluorescent lighting in six classrooms and the hallways.
4. Installed new ceilings in four classrooms.
5. Replaced floor and furniture in the second grade room.

At the Maple Street School:

1. Installed new roof over entire building.
2. Improved playground area by additional grading and installed new fence to protect shrubbery.
3. Installed new refrigerator and gas stove in lunch room.

At the Allen School:

1. Installed new fence for school yard along Granite Street and by the Beaudoin residence.
2. Graded playground area in part.
3. Redecorated assembly room.
4. Installed new refrigerator and gas stove in lunch room.

At the School Street School:

1. Graded playground area in part and installed new drain near center of school yard.
2. Extended backstop above fence by playground adjacent to homes on Winter Street.
3. Installed new refrigerator for lunch room.

At the East Rochester School:

1. Installed new return pipes for heating system in school lunch room.
2. Installed new drinking fountains and replaced sink in upstairs hallway.

The employment of a groundsman and maintenance man has added considerably to the appearance and upkeep of the Spaulding High School building and grounds. As a utility man during the winter months and poor weather this worker has completed many minor repairs, resurfaced desks, helped with snow removal and also served as nightwatchman two nights per week on a regular schedule during the winter season.

Four school janitors have retired during the past year. James Sanfacon terminated his services at the Maple Street School in February, 1951. William Herron, Leroy Redlon and John Nixon retired July 1, 1951.

The program for improving the physical conditions in the elementary school buildings should be continued.

All school buildings have been visited by a Civilian Defense Committee and recommendations formulated for the care of school children in times of an emergency.

PHYSICAL EDUCATION AND ATHLETICS

Good athletic teams should be a by-product of an adequate physical education program and proper health instruction for all children. The facilities and supervision for this work are entirely inadequate in our elementary schools. Athletic ability and interests do not develop at the high school level unless youngsters participate in sports and games of skill in the lower grades.

The grading of the playgrounds at the several elementary schools should be continued until well drained hard surfaced areas are available for competitive and recreational games of skill. These outdoor gymnasiums under proper supervision are necessary to develop the rugged constitutions and initiative needed by American youth. When boys and girls learn to enjoy playground activities they are on the right road to good health, citizenship, and teamwork. Recreation and physical culture are necessary for good mental and physical health.

FINANCING THE SCHOOL PROGRAM

The impact of inflation and the rearmament program are serious handicaps to the maintenance of educational opportunities in our public schools at a time when improvements are needed most. Our national obligation to preserve human freedom throughout the world by preventing the spread of communism requires higher federal taxation. The lowered purchasing power of the dollar further distorts our economy. As we face the present financial crisis at the national level we must not overlook or neglect the basic values of community services at the local level. The present trend toward national extravagance cannot be remedied by economies in local government without curtailing essential services. The schools are emphasizing thrift more than ever before as all other agencies should.

The present salary schedule for teachers should be revised and certain provisions clarified. Excellent teachers deserve high priority and America needs more good teachers to make the profession what it should be.

A comparative study of total expenditures for the Rochester Schools and the per capita average expenditures for the State of New Hampshire (see Tables G, H, and I) indicates a conservative budget for the better than average educational program offered in the Rochester Schools.

September 1	Labor Day
September 2	Teachers' Meeting
September 15	Children's Day
October 13	Columbus Day
November 11	Armistice Day
November 27-28	Thanksgiving Recess

Due to regulations of the State Board of Education requiring sessions on 180 school days it is recommended that the Rochester Public Schools shall not close due to inclement weather. School days lost in case of extreme emergencies will be made up by extending the school year in June, 1953.

Parents are expected to show good judgment on school attendance whenever unusual conditions may effect the health or safety of their children.

NO SCHOOL SIGNAL

Twenty-two upon the fire alarm will be the signal for no school. When sounded at 7:05 and 7:45 all schools will be closed for the day. When sounded at 11:15 pupils will be dismissed at the usual morning closing hour for the rest of the day. The same signals will be sounded at Gonic and East Rochester. Notification will also be broadcast from Station WWNH and Station WHEB at 7:15 and 7:45.

CONCLUSION

Reliable evidence shows that the Rochester schools are good schools. Some improvements are needed. With a few changes our schools would be definitely superior.

The growing pains caused by the increased enrollments in the lower grades create numerous problems that cannot be remedied to the complete comfort and satisfaction of all concerned.

The numerous projects completed by the six Parent-Teacher Associations and the several Civic Clubs in Rochester have done much to provide for the otherwise unmet needs of school children.

The continued cooperation of parents, teachers, and all other personnel is appreciated.

I wish to thank and commend you as members of the Rochester School Board for your efforts to provide good schools and the essential improvements for a modern educational program.

Respectfully submitted,

JOHN H. FRYE,
Superintendent of Schools.

REPORT OF PRINCIPAL OF HIGH SCHOOL

February 1, 1952

Mr. John Frye
Superintendent of Schools
Rochester, New Hampshire

Dear Mr. Frye:

I hereby submit my report as Principal of Spaulding High School.

ENROLLMENT

	7	8	9	10	11	12	P.G.	Tls.
September, 1950	158	136	171	175	139	139	12	930
September, 1951	153	154	166	136	155	125	3	892

Our junior high school enrollment continues to increase, an indication that our senior high school enrollment will be higher as these classes progress through high school. We have about forty less high school pupils this year than we had last year. The low birth rates of the depression "thirties" are the main reasons for the smaller number now in senior high school. Other reasons are enlistment in the armed services, more attending private parochial schools and the higher costs of education for tuition pupils.

In spite of these latter reasons I expect a higher high school enrollment next year because of the larger numbers now in the grades.

ADMINISTRATION AND GUIDANCE

We have helped pupils in the learning process by grouping them in college preparatory, commercial and general divisions. The work in all the classes has been facilitated and standards raised because of a resultant greater degree of homogeneity and the pursuit of common objectives. We have tried, also, to help pupils understand their own abilities and interests. In this work we have been assisted by the use of the results of tests administered by the University of New Hampshire. The Guidance

teachers, Mrs. John Chase and Mr. Edward Herman, are discussing the test results with all the pupils. These findings are likewise available to all teachers as aids in teaching their classes. Parents are urged to come to the school and discuss the test results with the guidance workers and many have done so.

Our English teachers have been especially alert to the needs of those with difficulty in reading and many of our classes have been set up with these pupils in mind. There is a definite need for materials which can be used with more effectiveness in these groups, especially in the junior high classes. The need for reading comprehension is found in every subject, be it in the field of history, science, mathematics or English. Because we feel strongly the urgency of improving reading ability since every subject is dependent on it, we are pleased that our tests reveal that such improvement is being made.

Many of our teachers were enrolled in a First Aid Red Cross Course taught by Mrs. Virginia Hawkensen, a member of our teaching staff.

Professional teachers' meetings are held regularly and administrative meetings as the need arises.

Plans have been made to administer subject achievement tests to grades ten and twelve this year and each year. Tests of mental ability, mechanical aptitude, clerical aptitude and types of interest are given to freshmen and juniors each year. These test results are the means by which we guide pupils into correct courses, and discover whether or not their achievement correlates with their ability.

ATHLETICS AND PHYSICAL EDUCATION

Our athletic activities continue to play an important part in our school life. Director of Athletics, Edward Herman, schedules all Varsity sports and coaches Varsity football and baseball. He is assisted in football by Mr. George Taylor. Mr. Harold Thompson and Mr. Ernest Davis coach junior varsity football; Mr. Davis also coaches junior varsity basketball while Mr. Theodore Lylis coaches junior high basketball and varsity track assisted by Mr. Benjamin Mooney in the latter activity. Mr. George Taylor coaches varsity basketball.

Our teams have had good seasons in all sports, winning an average number of times in each.

Our Physical Education Department is planning an evening exhibition this year. On this occasion, we hope to show parents and friends the types of activities carried on and the manner in which their children participate. This exhibition will be in charge of Mr. George Taylor and Mrs. Sharon Di Rubio.

Intramural games are played in touch football, basketball, and baseball. Thus we have opportunities for all boys and girls to participate, if they have any desire to do so. Mr. Davis supervises the boys and Mrs. Di Rubio the girls.

CO-CURRICULAR ACTIVITIES

We have carried on practically the same activities this year as before. One notable addition is a Radio Club in which we have four members with licenses as "hams." A club room has been set aside, an aerial erected and sending and receiving sets installed. This club is beginning to reach into the junior high for members.

Teacher advisers are as follows:

Mr. Donald McDuffee	Radio Club
Mr. Arthur Cutter	Future Farmers of America
Mr. Theodore Ayer	Boxing Club
Mrs. Marion Underhill	Library Staff
Mr. James Cook	Instrumental Music
Mrs. Norine Spelman	Vocal Music

STUDENT ACTIVITY ASSOCIATION

The Student Activity Association composed of all the pupils elects a council which meets every week with Mr. Harold Hanson. It acts upon money matters concerning athletics and discusses anything which concerns students and their activities, social, cultural and scholastic.

The council pays the bills and supervises a budget of about $20,000.00. This year we have been aided in meeting our expenses by the removal of the necessity of paying the admissions tax. This factor will aid us materially in meeting our obligations. The school board voted that we could have a tag day for the benefit of our Student Activity Association and we plan to have one in the spring. We hope that with this revenue we can have a complete athletic and co-curricular activity program.

CAFETERIA

Our cafeteria is continuing to serve well-balanced attractive lunches. Our pupils continue to patronize it in large numbers. The cafeteria offers an opportunity for about fifty boys and girls to earn their lunches by helping to serve during one-half of their noon hour. Mrs. Cassie Richardson, the manager, not only has charge of the high school, but also supervises the lunch program in the five elementary schools. The program is now known as the Rochester School Lunch Program.

It has been difficult to maintain our high standard of quality meals with the higher food prices and another cut in government subsidy. We feel that we have succeeded so far, however.

A financial statement is appended.

GRADUATES OF THE CLASS OF 1951

Our graduating class of 1951 numbered 132. Of this number sixteen are attending four-year colleges as follows:

11 University of New Hampshire
1 Plymouth Teachers College
2 St. Anselm's
1 Boston University
1 Tufts College

Others are attending post secondary schools as follows:

2 Westbrook Junior College
5 McIntosh Business College
1 Worcester Academy
2 New Hampton School
1 Joliet Junior College
1 Bentley School of Accounting
1 Burdett's Business College
1 Wentworth Institute
1 New England School of Art
1 Nichols Junior College
1 Wilfred Academy
2 Post Graduates, Spaulding High School

Three girls have joined the Women's Army Corps, four boys are in the Air Force and four are in the Navy. Eight members of the class are married. Six have taken up training to become nurses. Seventeen are working in factories and service stations; seventeen in stores; six in offices; two as telephone operators and sixteen are at home.

CONCLUSION

It is a pleasure to serve the citizens of Rochester as Principal of Spaulding High School. We have a most cooperative staff of professionally-minded teachers to help pupils learn and an excellently equipped building.

We are grateful for the help and cooperation of the superintendent and school board.

Respectfully yours,

JOHN M. COTTON,
Principal.

REMARKS:

Circulation appears to be leveling off, the growth being less spectacular as the figure approaches a figure satisfactory for the size of our school. Individual attendance has dropped considerably. The increase in class use would account for part of the decrease; other factors are more difficult to reckon, such as the number of days the library has been closed due to its use as a study hall while tests were being given in the main study hall, or other legitimate variations in the use of the library. On the whole, the attendance has been satisfactory, and the pupils have used the library freely for reading purposes both as students and as recreational readers.

The library has received gifts of books from several individuals and is indebted to the P. T. O. for subscriptions to BOY'S LIFE and THE AMERICAN GIRL, intended especially for the coming grade eight.

Library Staff membership has been raised to a limit of twenty members whose work is increasingly effective. The librarian has completed the first part of a Library Staff handbook, covering in detail the requirements for membership and the first three (basic) degrees of training. Certificates were awarded at the last assembly of the school to seventeen members who had served at least one year on the Staff and had passed at least two degrees of training. Over and above these requirements, four of the Staff had two years of service to their credit and two others had served four years. Three of the staff had completed three degrees of training, and two had finished four degrees. The first three of these degrees include a thorough knowledge of all the routines of shelving books properly, the mechanical processes of preparing new books for circulation and attendance at the circulation desk. After these three degrees are passed the staff member may elect training in special fields such as mending, filing, preparing clippings and pamphlets for the vertical file, lettering, etc.

A variety of special events marked the year. Stephen W. Meader spoke at a school assembly as the guest of the Library Staff and was entertained in the Library at a tea served by Mrs. Springfield's Foods Class. There was an exhibition of new books, a Christmas party, a shower for our engaged girl, a picnic meeting with library clubs from three other New Hampshire schools. A final outing at Canobie Lake completed the year.

The book collection continues to be shaped in accordance with the plan outlined in last year's report, following the same general philosophy. Our aim is twofold: to supply background reading in support of the courses of study offered by the school, and to encourage recreational reading among pupils of all grades.

The magazine collection has grown in effectiveness. We now have on file five years of back numbers of most of the periodicals we receive. Pupils in the high school are taught to use the Reader's Guide and can locate through that index magazine articles to use for reference.

The vertical file has justified the initial expense for the cabinet containing pamphlets, pictures, maps and clippings, but we need an additional section to provide space for the growing collection of this material.

The success of a school library depends in large measure on the cooperation of other departments in the school, and in this respect we have every reason to be grateful for the readiness with which the administration and the teachers have given aid. The school office is never too busy to deal with a library problem, and many a teacher has taken time to review a new book or advise about the adequacy of an old one, to bring a class into the library and help fit the book to the reader. Without these things we could not have had so good an opportunity for service, and all of them make the library function more effectively in the school.

Respectfully submitted,

MARION D. UNDERHILL,
Librarian.

REPORT OF THE SCHOOL NURSE

To the Superintendent of Schools:

I herewith submit my report as School Nurse for the year of 1951.

The annual health services offered the children of the Rochester schools consist of vision testing, hearing testing, physical inspections, and frequent hair and skin inspections. Weekly visits were made to the schools and, at this time, the teachers were given an opportunity to talk with me concerning the health of their pupils. Communicable disease control is exercised as far as possible by the exclusion of children showing signs of illness. The teachers are on the alert at all times in noticing any deviation from the normal condition of the pupils. There are a number of important activities connected with the school health service which I will summarize in the following paragraphs.

The physical examination program of our schools is carried out under a plan which is recommended by the leading authorities on school health. Health education authorities agree that an examination every four years is adequate. Dr. Albert Barcomb, School Physician, examines grades one, four, seven, ten, and new pupils. These examinations are followed up by periodic inspections made by me, as school nurse. Dr. Barcomb shows a keen interest in the school health work and he is always very generous with his time and medical advice.

A series of urine analyses were made on the pupils of grade four. There were one hundred and eleven urine examinations done at Dr. Barcomb's office. Six sugar reactors were found in this group and twenty-four hour specimens were taken on these children. In the last analysis there were no reactors. This was done on an experimental basis and it has not been decided, as yet, whether or not it is advisable to do this again this year.

The Rochester Dental Clinic is functioning as it has for the past few years. Drs. Wilfred T. Roy and Roland P. Cullen devote two half days each month from November until June to this clinic. Corrective dentistry is done on a selected group of children. The dentists deserve much credit for allotting so much of their valuable time to this work at greatly reduced rates.

Mention should be made of the bimonthly Orthopedic Clinic and of the Orthopedic Physiotherapy Clinic. The children of Rochester and surrounding communities are privileged to have the services of Drs. Ezra Jones, Carl Friborg, and David Webster. These men are specialists in Orthopedics. Dr. Ursula Saunders is the attending examining physician. The clinic is under the direction of the Crippled Children's Services of the New Hampshire State Board of Health and is held at the Frisbie Memorial Hospital. An Orthopedic Physiotherapy Clinic is held at the Spaulding High School each month as a follow-up to the diagnostic clinic.

Five pre-school conferences were held in June, 1951. The following is a tabulation of the conferences as a whole:

Number of children attending	109
Number of children examined by a doctor	106
Number of children inspected by the nurse	91
Number of vision tests	91

The parents were notified of the defects found and it is gratifying to report that about 90% of the defective conditions were corrected or treated. This makes it possible for the first graders to start their school life in the best physical condition possible. I consider these conferences one of the most valuable of our school projects and would like to encourage all parents to take advantage of them.

The weighing and measuring of elementary pupils has been taken over by the teachers this past year. This allows more of my time for inspections, follow-up work, and home visits. A large part of a school nurse's time is spent in guiding and encouraging parents in their efforts to get their children's defects corrected or to provide the best possible conditions for their healthy development.

The welfare work, such as supplying adequate clothing for the underprivileged children, consumes considerable time during the school year. The children are referred to me by the teachers and I visit the homes and help to secure the necessary articles of clothing. The financing of correction of defects which cannot be afforded by the parents is taken care of by local charitable organizations. The Kiwanis Club has made it possible for children to have tonsil operations, vision corrections, and other medical care. The Lions Club has provided vision corrections for a number of pupils.

Each writing of this report finds us all more indebted to the members of the Red Cross Motor Corps for their untiring efforts to provide transportation for local children to the many clinics in Rochester, Portsmouth, Manchester, Concord, and Boston. The drivers are volunteer workers under the direction of Mrs. Elery J. Lyndes.

I want, Mr. Frye, to thank you and the teachers for the cooperation I have received during the year of 1951.

Respectfully yours,

NORA C. SCAHILL, R. N.,
School Nurse.

INAUGURAL ADDRESS

by C. Wesley Lyons, Mayor

January 2, 1952

Gentlemen of the Council:

The present struggle for the control of men's minds, which goes on throughout the world at this time, employs two great and powerful weapons: mass psychology and powerful means of communication. The methodical repetition of falsehood and deceit seeks to destroy not only the basic elements of truth and integrity but also contempt for all who would defend themselves from such tyranny. The resulting tension and uncertainty concerning international policies make government at the local level a serious challenge to those who would preserve individual freedom. Our American heritage must be preserved at the community level with a spirit of cooperation, sacrifice, and strong determination to combat inflation and corruption. It has been said that a society of self-governing men is more powerful, more enduring, more creative than any other society, however disciplined and centralized.

As you undertake your duties as members of the City Government to provide for the welfare, security and progress of the people of the City of Rochester, New Hampshire, in this new year that lies ahead, you should find a challenge and much inspiration in the confidence that your fellow citizens have placed in you.

In his speech at Faneuil Hall in Boston, Daniel Webster said: "Men hang out signs indicative of their respective trades: shoemakers hang out a gigantic shoe, a jeweler a monster watch, and a dentist a gold tooth. But in the mountains of New Hampshire, Almighty God has hung out a sign to show that here he makes men." It is our duty as city officials to maintain this heritage, as advertised by continuing to provide the facilities necessary to make Rochester not only a progressive city but a community in which one wants to live.

The Charter of our city has been amended during the years so that, as of today, we have only four departments. The Fire and Police are departments for the protection of our citizens and those who are guests in this community; our Public Works for the maintenance of our highways, sewers, and the operation of our Water Division; and our Department of Education.

Our Fire and Police Departments must be progressive and alert, and you as Gentlemen of the Council must from time to time continue to provide them with the facilities which are necessary to keep them abreast of the times and give the fullest protection to our citizens.

Our Public Works Department has also many responsibilities: the maintenance of highways for adequate and safe transportation, and our collection of refuse and control of the sanitary fill. One of our most essential divisions of the Public Works is the maintenance of our water and sewer systems. The above mentioned should receive every consideration and assure the

health of our citizens and the cleanliness of our city, for which we are noted. Let us continue! Lastly in our Public Works Department is our Shade Trees, Parks and Commons, and may I again emphasize the importance of this sub-division. We must keep our parks and commons beautiful! They not only are appreciated by those of us who live here, but make a favorable impression upon the many thousands who pass through this community during all seasons of the year. I trust that the Committee on Public Works may give some consideration to the planting of new trees, which we have neglected for a long while. And last but not least in this department, we have our supervised playgrounds. In the past, you have heard me state many times that the youth of our community cannot be measured by the material things of life, and because of them we make every effort to maintain a city in which you are proud to raise and educate your children, and how closely this works into our educational system. During the last few years there have been definite, progressive steps in the public playgrounds of the City of Rochester. We have not only received fullest cooperation from the Parent-Teacher's Associations of the various areas, but have been so fortunate as to have had the assistance of a director made possible through the Community Activities. I personally regret very much the fact that Jack Penney could not have continued here. However, I am thankful that he has an advancement, and I am most positive that our new director, Mr. Fred Merrill, will be equally cooperative.

As our supervised playgrounds and our educational system interlock, I will continue. The schools we want for our children will teach them the things men have learned about the world and mankind, and the new ways of living and working together in a fast-moving, complex and dangerous world. Our children must be prepared to use new ideas and mechanical devices, new behavior patterns, and to face new and controversial issues. Though guided by the mistakes of the past and "guardians of the permanent good," they must also be independent and creative. An adequate school program includes far more than "book learning." It helps children to become good citizens, physically fit, and intelligent consumers as well as producers, and to realize how they can help build a better community. We want our children's schools to be wholesome places for learning and growth. At all times we want their environment to be safe, comfortable, clean and attractive. We want their teachers to be competent and cultured persons who understand children. The public demands much of our public schools and supervised playgrounds at the present time, and they may be well justified in their demands.

In the past, many of our citizens have conveyed perhaps to all of us their dissatisfaction in the operation of our traffic lighting system. I would not only be personally gratified, but I know that many of our citizens would feel that they were having some consideration if we again attempted to make such changes as they deemed necessary. I urge that the Traffic Committee make a thorough study of the existing conditions and bring them before the Gentlemen of the Council as a whole for their consideration.

I hesitate not to call your attention to the Civil Defense of our city. We are fortunate in having a Civil Defense Director and a Civil Defense Council, composed of representatives of the military organizations of the City of Rochester. These men are devoting unlimited time and effort in an organization which is definitely essential for the safety of our citizens. I am pleased with this opportunity to publicly acknowledge and to thank the members of the 1951 Council and the Civil Defense organization for their mutual cooperation.

In 1951, with the assistance of the Gentlemen of the Council, in spite of the loss of some taxable property, we maintained a tax rate which was below the average in Strafford County, and Strafford County, may I add, was one of the four lowest in our State. This could not have been done without the assistance of the Gentlemen of the Council. I realize it would be difficult to measure your personal satisfaction and gratification in your accomplishment. I appreciate that it is your desire that we may make every effort to continue to do this in the future and still maintain a reasonably low valuation. In looking to the future, it seems that this is more important now than ever before.

Before this Council Body meets again, perhaps a month will have gone by, so at this time, as a member of your Finance Committee, I ask that the head of every department immediately build his budget for 1952.

In this communication to you, you will note that I have not dwelt upon the needs of our various departments or how they should be operated. The majority of you have served as members of the City Council. You are well aware of the demands of the citizens of Rochester and are also familiar as to the way in which these various departments should operate. We are convinced of the fact that our present water system must be developed to meet the ever-increasing demands. I believe that you are confident that steps should be taken to accomplish this. Our new members have been active in the affairs of this community for many years, and have shown much interest in the affairs of Rochester. We have a further obligation to our boys serving in Korea, who are a portion of the 350,000 facing a ruthless enemy in dugouts on those frozen hills, with thousands of their fellows bearing hardships in Communist prison camps.

In looking back over the year in appraisal of the many things that you have accomplished, to be thankful for, and in summarizing a few of them, I will call your attention to your Municipal Parking Lot, which has been a definite asset to Rochester and to our merchants who have openly expressed their appreciation. Your Municipal Garage has received many favorable comments. Although your Police Garage and Comfort Station is not as yet completed but well under way, it will definitely not only meet the needs of our police equipment but will be a public service to our community.

In the past years that I have been privileged to work with you and with the various organizations in our community, you have undoubtedly heard me many times state how fortunate we are to live in the type of city that is ours. As I look back over the years, it would be impossible to state the cooperation and assistance that these various organizations have given to make

Rochester what it is: a city where we all work together regardless of race or creed. Our citizens have maintained a Chamber of Commerce, essential to every city, and they have contributed wholeheartedly to our Community Chest and Red Cross campaigns.

I personally feel that you have made a progressive step in the past two years by becoming affiliated with the Lakes Region Association and contributing to it. How fortunate it is that we realize that we cannot confine our thoughts to one particular area. Why is there cooperation and progress in Rochester? Why do its people work together and its various organizations function successfully? It is because we have men who are willing to devote their time and their efforts without compensation to conducting the affairs of their municipality. If this were not so, Rochester would not be looked to, perhaps I may even say with a little envy, for the things that we have and we together enjoy. Let you make every effort not only in the year of 1952 but in the many years ahead, that Rochester may continue to be progressive, on the alert and known as "The City of Friendly People." Citizenship is a privilege and not a burden, and your position as members of our City Government is an honor that you should assume as free Americans.

In December, the first issue of "New Hampshire Profiles" was introduced—a publication that will be of outstanding interest not only to the residents of New Hampshire but to those who love to come here and enjoy its recreational advantages. In this magazine was a full page picture of our State Trade Mark, the Great Stone Face, which is a symbol of what is best in our hearts and minds. Below this photograph we have that poem, "A New Hampshire Profile" by Frances Ann Johnson, a native lecturer and a lover of New Hampshire; and in closing, with your permission, I will give this poem which I trust will be an inspiration to us all.

Within a small, tree-shadowed space
I can look up and see a Face
Ice-chiseled long ago.
If I desert that favored sphere,
The noble features disappear
And only ledges show.

It all depends on where I stand
If shapeless rock or something grand
Is visible to me.
And what I choose to keep in view
Becomes a part of all I do
And all I hope to be.

I'll have to choose with equal care
The stand I take in life, for there
Within my little place
I'll either see just rock and sky
And never know or wonder why—
Or I'll behold a Face!
